

PRESIDIO MANAGED CLOUD

TAILORED SOLUTIONS FOR A HYBRID WORLD

A PRACTICAL APPROACH TO HYBRID CLOUD

Today's IT landscape is evolving rapidly. The abundance of new off-premises, cloud-based software and infrastructure resources is making it easier for organizations of all sizes to choose new ways of providing and procuring IT internally. This has manifested itself both within and outside the control of IT, resulting in growing complexity and the potential for unauthorized Shadow IT which brings loss of control and potentially higher operational risk.

As organizations leverage these new services, the challenges around managing this hybrid IT environment grow rapidly given the multitude of resources and services both on- and off-premises heavily relied on by end users. Orchestrating the services, assets and resources in such hybrid IT environments requires the right tools to ensure that the multitude of benefits of using such an approach can be fully realized.

HYBRID IT ACCESSED AND MANAGED WITH A SINGLE PORTAL

Service Overview

Presidio Managed Cloud (PMC) provides clients the self-service portal for single-tenant private cloud today and hybrid cloud tomorrow. By starting first with the private cloud, Presidio Managed Cloud helps clients not only address the challenges of Shadow IT but also realize the significant benefits of cloud computing without having to build and manage the cloud environment. Specifically, Presidio Managed Cloud:

- Creates a service catalog for CIOs to leverage and provide IT as a service to the business
- Enables end users to procure IT services quickly and efficiently through an intuitive, self-service portal that is customizable and easy to use across PCs, tablets and smartphones
- Allows clients to extend their single-tenant private cloud environment today through a hybrid cloud approach leveraging multi-tenant public cloud services to meet tomorrow's business demands
- Offers flexible consumption models for IT whether the resources are based in the private cloud or sourced from public cloud providers

We help clients unlock the unlimited potential of a completely connected world.

Key Benefits

Presidio Managed Cloud enables you to realize the benefits of true cloud computing:

- Address Shadow IT challenges and improve IT governance
- Focus on the core business rather than maintaining the cloud environment
- Increase the speed of adoption of IT services
- Provide users with intuitive, self-service procurement of IT services
- Decrease operational costs and optimize IT cost control
- Accelerate time-to-benefit for IT services

Standard Features

The following are included with PMC:

- "White Glove" PMC Service Initiation
- Incident & Problem Management
- Orchestration & Request Fulfillment Management
- Release/Patch Management for PMC portal
- Change Management

PRESIDIO MANAGED CLOUD

User-Friendly, Self-Service Portal

A key differentiator of PMC is the simple, intuitive user interface that was built from the ground up to support customization for specific application workloads. Designed for business and application users, the portal is multi-device enabled for PC's, tablets and smartphones.

Experience the Benefits Today

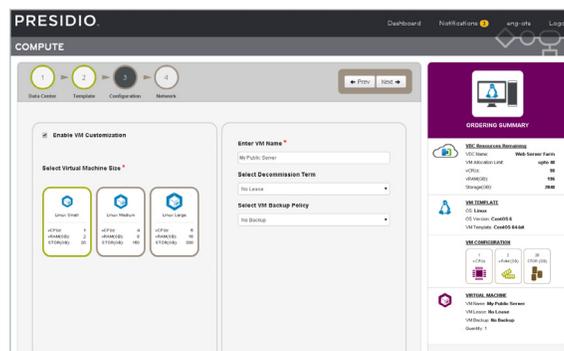

Presidio Managed Cloud provides customers a managed orchestration-as-a-service solution that allows IT to become an internal service provider to their end users. Getting started requires little upfront effort as PMC comes with a pre-populated service catalog and embedded approval workflow engine. For users, PMC is simple to use with an intuitive user interface, and the entire experience is highly customizable to ensure IT provides what is needed today while laying the foundation for what will be required tomorrow. Specifically, customers with the following characteristics can benefit from adopting PMC today:

- In-house development activities requiring real time provisioning of dev/test environments
- Experiencing Shadow IT
- Looking to reduce spending on non-strategic activities
- Looking to offload ongoing management and operations of the data center
- Rolling out new applications
